HOW TO GROW RED WING AZALEAS FOR CHRISTMAS FORCING

1. The last pinching should be in May. If plants are grown in greenhouse, last pinch can be made up to June 15th.
2. After buds are fully developed, usually in September, plants should be kept in cool place till ready for benching.
3. Bench about November 1st with night temperature about 60 degrees. Raise temperature if necessary to 65 or 70 degrees.

HOW TO GROW RED WING AZALEAS FOR LATE WINTER AND SPRING FORCING

Make last pinch about July 15th. When plants are ready to make buds, they should be kept in a greenhouse or lath house that has a fairly high day temperature and cool night temperature.

BIRD PEAT POTS

Bird research scientists performed real magic in developing the new Bird Peat Pot—rugged for easy handling, nutrient treated for healthy plants. Special formula gives added rigidity to help prevent chipping during shipping and handling. Yet roots penetrate freely. Rugged rim provides extra strength at the most vulnerable area—to protect top from breakage. Pot is nutrient saturated to stimulate healthy and speedy premium growth.
